FOR IMMEDIATE RELEASE

Carson, California; September 6, 2001. “LONCOIN II – THE FLOOR THAT SOARS.” Since its first discovery by the aircraft manufacturers at Douglas some twenty years ago, to its adoption by leading aircraft innovators such as Boeing and Airbus today, Lonseal Flooring has soared above its competition – largely due to the outstanding quality of its signature slip-resistant resilient flooring product: **Loncoin II**.

The unique fabrication of Lonseal’s original Loncoin II flooring towers head-and-shoulders above the copycat coin-pattern floors on the market today not only because of its ability to surpass U.S. Federal Aviation Administration standards for flame spread resistance, nor only because of its sheet production – allowing it to be easily installed and chemically or heat welded for sanitary floor sealing, but because of its impressive proficiency in exceeding the common friction-sliding factor of 0.45; thus making Loncoin II one of the most slip-resistant floors in the skies – a key advantage for all operators of commercial airplanes and helicopters who desire to protect their passengers and crew from the mischievous whims of the weather as people stretch their legs and move about the cabin.

With a range of 15 colors, and custom-coloring available for larger orders, Loncoin II is as beautiful as it is useful. Furthermore, with an innovative blend of cutting-edge polymers, its sturdy vinyl construction means that Loncoin II is oftentimes every bit as durable as the aircraft in which it’s been installed – a potent lure to aviation industries covetous of reducing the lifecycle-maintenance costs of their primary capital investments. Plus, with new hush-hush slip-resistant patterns in development with some of the industry’s

leading aerospace engineering centers, Lonseal's Loncoin II is just the foundation of our heavenly flooring innovations.

Boasting such prestigious clients as American Airlines, Northwest Airlines, Delta, Gulfstream Aerospace, Federal Express, Continental Airlines, Saudi Air, Swissair, Brazilian Airlines, Air New Zealand, Carnival Airlines, Korean Airlines, Britannia Airways, Boeing, Airbus, and over fifty other airlines and aircraft manufacturers worldwide, Loncoin II has proven that it stands alone on the floor of the skies.
